CURRICULUM AND MODULE SPECIFICATIONS

2007

PLOT B, BIDA ROAD, P.M.B. 2239, KADUNA – NIGERIA

NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING PROGRAMME

GENERAL INFORMATION

GOAL:

This programme is designed to produce skilled craftsmen with good knowledge of the application of the equipment, materials, techniques and safety practices in Fabrication and Welding of metal projects.

OBJECTIVES:

On completion of the programme, the student should be able to:-

- (1) Carry out gas welding and cutting jobs on all types of metals.
- (2) Produce simple finished structural steel work projects with safety, using relevant equipment and techniques.
- (3) Apply protective wetting against corrosion on finished metal projects.
- (4) Market finished metal projects.

ENTRY QUALIFICATION:

The minimum entry qualification into the National Vocational Certificate in Fabrication and Welding programme is Post basic Education Certificate (Post JSS).

STRUCTURE OF PROGRAMME:

The national Vocational Certificate (NVC) Fabrication and Welding programme is in flexible modular form, and is structured to have three parts (i.e. NVC Part I, NVC Part II, and NVC Final) each taken in a span of one year. Each part shall have a cogent and flexible structure and content that would allow the trainee a practical working skill unit and the possibility to exit at that level.

Each part incorporates six months intensive training in the school and three months of supervised industrial work experience (SIWES).

In a 14 weeks term, 12 weeks will be for academic activities while 2 weeks will be for registration and evaluation.

For a 40hrs week, 6hrs will be for core theory courses; 2hrs General education courses and 32 hrs will be for practical.

EVALUATION SCHEME:

The National Vocation Certificate Examination must be externally moderated. In grading the awards; theory shall constitute- 20%, practical- 50% and SIWES- 30%.

The foundation and GNS courses are available in the parent course syllabus.

**NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND
WELDING**

PROGRAMME: NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING

COURSE: GENERAL METAL WORK I

COURSE CODE: VFW 11

DURATION: 6 HOURS PER WEEK (2 HOURS LECTURE; 4 HOURS PRACTICALS)

Goal: This module is designed to introduce the student to basic Principles and processes of Metal work and appropriate safety regulations

General Objective: On completion of this module the student will be able to:

1. Understand workshop safety rules and their application in machine shop.
2. Know the physical properties, manufacturing process and application of ferrous and non-ferrous metals in common use
3. Know how to Select and use common measuring, marking out, cutting and striking tools.
4. Understand the basic working principles of drilling machine and be able to use it for various types of screws threads rivets, and be able to rivet and cut screws by hand.
5. Understand the application of various types of screw threads and rivets, and be able to rivet and cut screws by hand.
6. Understand the ISO system of tolerances and fits, and their application in engineering production.
7. Know how to produce simple engineering components on the bench.
8. Understand the essential features and working principles of the centre lathe and carry out basic operations such as turning, stepped turning facing, taper turning. Knurling, chamfering and undercutting.

NVC in Fabrication and Welding (Draft)

PROGRAMME: NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING						
COURSE: : General Metal Work I			COURSE CODE: VFW II		CONTACT HOURS: 6hrs/wk, 2L: 4P	
GOAL: This course is designed to introduce the students to basic principles and processes of metal work and to the appropriate safety regulations						
COURSE SPECIFICATION: Knowledge Requirement				Practical Contents:		
General Objective: 1.0 Understands workshop safety rules and application in machine shop.						
General Objective:						
WEEK	Specific Learning Objective	Teachers Activities	Learning Resources	Specific Learning Objective	Teachers Activities	Learning Resources
1.	<p>1.1 State sources of hazards in the workshop and how to prevent them e.g</p> <p>a. handling and using hand tools, portable power tools and machines;</p> <p>b. stepping on or striking obstructions left on floors or benches;</p> <p>c. lifting, moving and storing materials or jobs;</p> <p>d. using inflammable or corrosive liquids and gases;</p> <p>e. inhaling vapours or fumes;</p>	<p>* State sources of hazards in the workshop.</p> <p>* Show a film on industrial safety.</p>	<p>Classroom facilities.</p> <p>* Safety posters,</p> <p>* Television, video machine.</p>	<p>1.1 Use hand tools, portable power tools and machines in lifting, moving and storing materials or job.</p> <p>1.2 Demonstrate first aid application in cases of minor cuts, electric shock, burns.</p>	<p>* Demonstrate safe ways of handling basic hand tools.</p> <p>*Show a film on industrial safety.</p> <p>* Demonstrate how to treat emergency like artificial respiration cold compress, etc.</p> <p>* Assess student understanding of the topics using questions / answers and practice.</p>	<p>* Hand tools and files, hacksaw.</p> <p>* Television, video machines</p> <p>Posters on artificial respiration, cold compress etc. goggles, gloves, safety boots, head shield fire extinguisher.</p>

NVC in Fabrication and Welding (Draft)

	<p>1.2 Explain the application of factory safety regulations in the machine shop.</p> <p>1.3 Name safety equipment and wears essential in the machine shop, and state their application in working situations. Example: Eye goggles, gloves, safety boots, helmet, fire extinguishers, etc.</p>	<p>* Explain appropriate procedures to be taken in the event of workshop accidents.</p>				
2	<p>1.4 Outline safety rules and regulations relating to:-</p> <ul style="list-style-type: none"> a. clothing and health hazards; b. workshop hygiene; c. movement and other behaviour of workers in the workshops; d. materials handling; e. tool handling, storage and usage; f. machine operation; g. fire protection. <p>1.5 Outline appropriate procedures to be adopted in the event of workshop</p>	<p>* Explain safety rules and regulations in the workshop, highlighting a-g in 1.4.</p> <p>* Explain</p>				

NVC in Fabrication and Welding (Draft)

	<p>accidents Example: - a. application of first aid to the victim; b. removal or rectification of the accident; c. reporting the accident to the appropriate authority; d. keeping a record of accidents for management use.</p>	<p>appropriate procedures to be taken in the event of workshop accidents.</p>				
<p>General Objective: 2.0 Know the physical, properties, manufacturing processes and application of ferrous and non-ferrous metals in common use.</p>						
WEEK	Specific Learning Objective	Teachers Activities	Learning Resources	Specific Learning Objective	Teachers Activities	Learning Resources
3	<p>2.1 Explain the meaning of the following general physical properties of metals: Ductility, malleability, strength, toughness, brittleness, elasticity, plasticity.</p> <p>2.2 Describe the basic composition and properties of plain carbon steels, cast iron and alloy steel and state their application in the</p>	<p>* Give detailed explanations on the meaning of the following general physical properties of metals: ductility, malleability, strength, toughness, brittleness, elasticity, plasticity.</p> <p>Give the composition and specific examples of tools and equipment made from the</p>	<p>Class room facilities</p> <p>Textbooks.</p> <p>* Video and television including cassettes on production processes.</p>			

NVC in Fabrication and Welding (Draft)

	Copper, tin, zinc, aluminium and aluminium alloys brass (muntz metal, cartridge brass, gilding etc) metal, bronze (manganese bronze tunmetal, bell metal, aluminium bronze, phosphor bronze and lead.	and applications of the following non-ferrous metals: listed in 2.4. Assess the students understanding through questions and answers.				
General Objective: 3.0 Know how to select and use common measuring, marking out, cutting and striking tools.						
WEEK	Specific Learning Objective	Teachers Activities	Learning Resources	Specific Learning Objective	Teachers Activities	Learning Resources
5	<p>3.1 Explain with examples the difference between “line” and “end” measurement..</p> <p>3.2 Explain the use of datum points, datum lines and datum faces in marking out.</p> <p>3.3 Describe, the functions and application of the following instruments used in metal-work, steel rule, dividers, callipers (inside, outside and odd-legs), trammel,</p>	<p>Prepare notes that will clearly differentiate between “line” and “end” measurement..</p> <p>Prepare notes and examples that will explain the use of datum points, datum lines, and datum faces in marking out.</p> <p>Give explanations regarding the functions and application of: steel rule, dividers, callipers (inside, outside and odd leg)</p>	<p>Class room facilities</p> <p>Posters on the tools listed in 3.3 – 3.4 textbooks.</p>	<p>3.1 Use the following items in the workshop: a. micrometer b. vernier calliper c. vernier height gauge d. combination set</p> <p>3.2 Maintain and care for the instruments listed above.</p> <p>3.3 Perform marking out exercise on plane surfaces including profiles.</p> <p>3.4 File a piece of metal to</p>	<p>Demonstrate how to use micrometer, vernier calliper, vernier height gauge, combination set.</p> <p>Demonstrate the maintenance and care of the instruments listed above.</p> <p>Perform marking out for the students to learn and practice till they become competent.</p> <p>Demonstrate how to</p>	<p>Micrometer, vernier callipers, vernier height gauge, combination sets.</p> <p>Steel rules, dividers, punches, trammel, scribe angle place, vee block center square.</p> <p>Flat file, hand file, try square.</p> <p>File card, flat file.</p> <p>Ball pein hammers, mallet.</p>

NVC in Fabrication and Welding (Draft)

6	<p>scriber angle plate, vee-block, centre square.</p> <p>3.4 Describe the various types of files, stating their grades and applications. Types of files include: flat, square, round, half round, three square, warding polar, mill and rasp.</p> <p>3.5 Classify the common files use in metal work and state their composition of material used for their manufacture.</p> <p>3.6 Sketch the bench vice, explain its clamping power and demonstrate the technique of holding work in the vice for filing, tapping and designing operations.</p> <p>3.7 Describe the function of the various parts of a bench vice, its holding power while performing</p>	<p>trammel, scriber, angle plate, vee block, centre square.</p> <p>Prepare notes that will describe the various types of files, stating their grades and applications.</p> <p>Prepare detail notes that will classify the common files used in the metal work as well as staffing the composition of materials used for their manufacture.</p> <p>Demonstrate how to sketch a bench vice.</p> <p>Prepare detailed notes that will describe the functions of the</p>		<p>given specifications using any of the following: Cross filing, draw filing, filing square and flat surfaces.</p> <p>3.5 Test surface for flatness using surface plate and try square and state precautions to be taken to avoid pinning.</p> <p>3.6 Maintain files in good working conditions.</p> <p>3.7 Use various hammers and mallets e.g. ball pein, rubber mallets, etc for engineering purposes.</p> <p>3.8 Select and insert hacksaw blade correctly.</p> <p>3.9 Cut metal and other engineering materials to give specifications using the adjustable hacksaws, junior hacksaws, piercing saw, etc drills and Drilling.</p>	<p>file a piece of metal.</p> <p>Demonstrate how flat surface can be tested using surface plate and try square.</p> <p>Demonstrate how files are cleaned and state the precautions to be taken against pinning.</p> <p>Demonstrate the application of hammers and mallets for engineering purposes.</p> <p>Demonstrate how a hacksaw blade can be inserted correctly.</p> <p>Demonstrate how to use adjustable hacksaw, junior hacksaw piercing.</p>	<p>Hacksaw blade, hacksaw frame.</p>

PROGRAMME: NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING

MODULE: GENERAL METAL WORK II

MODULE CODE: VFW 12

DURATION: 6HOURS PER WEEK(2 HOURS LECTURE 4 HOURS PRACTICAL)

GOAL: **The module is designed to further enhance trainee's knowledge in basic metal work processes in fabrication and welding engineering such as forging, sheet-metal work and welding.**

GENERAL OBJECTIVES:

On completion of this module, the trainee should be able to:-

1. Understand the basic principles and processes of heat treatment of metal in the workshop.
2. Know how to produce simple engineering components by forging.
3. Understand the basic principles and techniques of gas and metal arc welding and apply them in fabricating simple metal components.

General Objective: 3.0 Understand the basic principles and techniques of gas and metal arc welding and apply them in fabricating simple metal components.						
WEEK	Specific Learning Objective	Teachers Activities	Learning Resources	Specific Learning Objective	Teachers Activities	Learning Resources
	<p>3.1 Describe the equipment and explain the basic principles and application of gas and metal arc welding.</p> <p>3.2 State the safety precautions to be observed and apply them in given welding situations</p>	<p>Prepare detailed notes and diagram that will describe the equipment and explain the basic principles and application of gas and metal arc welding.</p>	<p>Class room facilities</p> <p>* Recommended textbooks.</p>	<p>3.1 Set up and operate gas or metal arc welding equipment in given situations.</p> <p>3.2 Prepare joints for welding in given situations.</p> <p>3.3 Weld given components by arc or gas welding methods and state safety precautions to be observed.</p>	<p>- Demonstrate the use of both gas and metal arc welding equipment; and allow all the students to practice.</p> <p>- Demonstrate to the students how to prepare joints for welding purposes.</p> <p>- Guide students to weld various components using both gas and arc welding processes while applying all the safety precautions.</p>	<p>- Oxygen and Acetylene Cylinders and regulators, Arc welding set, goggles.</p> <p>- shield, electrodes, diagrams and charts of various welding joints.</p>

NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING

MODULE: SHEET METAL WORK

MODULE CODE: VWF 13

DURATION: 6 HOURS / WEEK: (2 HOURS THEORY, 4 HOURS PRACTICAL)

GOAL: This module is designed to acquaint the trainee with a good knowledge of sheet metal

GENERAL OBJECTIVES:

On completion of this module, the trainee should be able to:-

1. Know how to apply appropriate workshop processes, techniques and tools to mark out and form projects in sheet metal work.
2. Know the various solders used for sheet metal projects.
3. Know how to produce finished sheet metal project involving: edge stiffening, beading, finishing either as part of the corporate production process or an independent process.
4. Understand how to draw, develop and produce templates for production of sheet metal projects.

NVC in Fabrication and Welding (Draft)

PROGRAMME: NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING						
MODULE: SHEET METAL WORK		MODULE CODE: VFW 13		CONTACT HOURS: 6 HOURS PER WEEK 2L; 4P		
GOAL: This module is designed to acquaint the trainee with good knowledge of sheet metal work.						
COURSE SPECIFICATION: Theoretical Contents:				Practical Contents:		
General Objective: 1.0 Know how to apply appropriate workshop Processes, Techniques And Tools To Mark Out, And Form Projects in Sheet Metal Work.						
WEEK	Specific Learning Objective	Teachers Activities	Learning Resources	Specific Learning Objective	Teachers Activities	Learning Resources
1-2	1.1 Calculate the allowance for joint using the formula: grooved seam = 1 1/2x width of groover panned down and knock-up joints.	- Calculate allowance for joint using the give formula: grooved seam = 1 1/2x width of groover,	Class room facilities. Textbooks	1.1 Mark out the following projects on sheet metal materials applying appropriate tools, techniques and safety practices: a. rectangular container b. funnels c. cylindrical container	- Demonstrate the marking out of projects on sheet metal by applying the appropriate techniques and safety practices.	Sheet metals - Steel rule divider, scribe, compass
1 – 2	1.2 Name common rivets used in metal work and state their properties. 1.3 State common faults in riveting e.g. a. overlapping	- List and explain types of rivets used in sheet metal and their properties.		1.2 Cut sheet metals to given sizes using appropriate tools/machines 1.3 Form sheet metal to given shapes using appropriate tools, machines and	- Demonstrate sheet metal cutting to given sizes using appropriate tools and machine. - Demonstrate the formation of sheet metal	Cutting machine, steel rule gas cutting nozzles

PROGRAMME: NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING

MODULE: GAS WELDING AND CUTTING

MODULE CODE: VWF 14

DURATION: 6HOURS/WEEK; 2 HOURS THEORY; 4 HOURS PRACTICALS

GOAL: **This module is designed to equip the trainee with knowledge, attitude and skills to carryout gas welding and cutting jobs most common metals.**

GENERAL OBJECTIVES:

On completion of this module, the trainee should be able to:-

1. Understand and apply the general safety precautions related to gas welding.
2. Know how to apply successfully various gas welding processes/operations including the oxy-fuel gas cutting processes.
3. Know how to weld together basic types of non-ferrous and ferrous metals.
4. Understand the process of building up worn metallic shafts or surfaces
5. Know the basic welding defects and how to rectify them.

NVC in Fabrication and Welding (Draft)

PROGRAMME: NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING						
MODULE: GAS WELDING AND CUTTING		MODULE CODE: VFW 14		CONTACT HOURS: 6HOURS/WEEK/2 L /4 P		
GOAL: This module is designed to equip the trainee with knowledge, attitude and skills to carryout gas welding and cutting jobs on all types of Metals.						
COURSE SPECIFICATION: Theoretical Contents:				Practical Contents:		
General Objective: 1.0 Understand and apply the general safety precautions related to gas welding.						
WEEK	Specific Learning Objective	Teachers Activities	Learning Resources	Specific Learning Objective	Teachers Activities	Learning Resources
1				1.1 Carry transport and store full and empty gas cylinders safely using appropriate equipment.	- Demonstrate how to carry, transport and store full and empty gas cylinder safety using appropriate equipment.	Double cylinder trolley Gas cylinders. Filled oxygen and acetylene cylinders/regulators.

NVC in Fabrication and Welding (Draft)

3				<p>1.2 Apply appropriate safety precautions while carrying out the following:-</p> <ul style="list-style-type: none"> a. Gas welding operations on containers which have been emptied of chemicals, inflammable or explosive liquids. b. Gas welding near containers with inflammable materials e.g. petrol tank; and c. Gas welding in confined spaces. 	<p>Demonstrate appropriate safety precaution while carrying out the operation in 1.2.</p>	<p>Gas welding goggles. Blow pipes welding shields. Welding gloves Welding boots etc. Gas welding machine.</p>
	<p>1.3 Select, use and care for protective wears for carrying out gas welding operations, e.g.:-</p> <ul style="list-style-type: none"> a. welding goggles b. cover all c. gloves d. boots, etc. 	<p>Identify, use and care for protective wears for carrying out gas welding operations e.g.</p>	<p>Gas welding goggles. NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING

MODULE: **VFW 15 METAL ARC WELDING**

MODULE CODE: **VFW 15**

DURATION: 6 HOURS / WEEK- 2 HOURS THEORY, 4 HOURS PRACTICAL

PREREQUISITE VFW 12

GOAL: **This module is designed to equip the trainee with the knowledge, and skills to carry out Metal Arc Welding jobs involving various ferrous and non ferrous metals.**

GENERAL OBJECTIVES:

1. Understand and Apply Safety Precautions Related to Metal Arc Welding.
2. Understand the features and working principles of arc welding machines and accessories.
3. Know how to make different types of welded joints in all positions.
4. Know the properties of various types of ferrous and non-ferrous metals.
5. Know how to build up worn metallic shafts, and surfaces using metal arc welding.
6. Know how to cut Metals to various specifications using metal Arc Cutting process.

NVC in Fabrication and Welding (Draft)

7. Know the basic welding defects and how to rectify them.

Course: METAL ARC WELDING		COURSE CODE: VFW 13		CONTACT HOURS: 6hrs per week -2L; 4P		
GOAL: This course is designed to equip the trainee with the knowledge and skills to carryout metal Arc Welding jobs involving various ferrous and non ferrous metals.						
Course Specification: Theoretical Contents:						
Theoretical content			Practical Content			
General Objective : 1.0: Understand and apply safety precautions related to metal Arc welding.						
WEEK	Specific Learning Outcome	Teacher's Activities	Learning Resources	Specific Learning objective	Teachers Activities	Learning Resources
1	1.1 List and explain the hazards related to metal arc welding, e.g <ul style="list-style-type: none"> a) Arc eye b) Burning c) Radiation d) Electric shock e) Toxic fumes, etc 	<ul style="list-style-type: none"> • Explain the hazard related to metal Arc welding as listed in 1.1 	Classroom facilities. Recommended textbooks	1.1 Select, use and care for protective wears required while carrying out metal arc welding operations, e.g <ul style="list-style-type: none"> a) Head and hand shield b) Hand gloves c) Apron d) Spats e) Boots and leggings, etc. 1.2 Apply appropriate safety precautions while carrying out: <ul style="list-style-type: none"> a) Arc welding in confined 	Demonstrate the use and care for protective wears while metal Arc welding. Show the items listed in 1.1 to students and give detailed notes Explain Safety precautions while carrying out operations in 1.2	<ul style="list-style-type: none"> • Items listed in 1.1 Arc welding Equipment Protective wears e.g. boots, apron,

NVC in Fabrication and Welding (Draft)

				<p>b) spaces Arc welding empty vessels or drums that had contained inflammable or toxic materials</p> <p>c) Arc welding near inflammable materials</p>	Ask students to demonstrate the appropriate safety precaution while carrying out arc welding as listed in 1.2	goggle, shield etc.
General Objective: 2.0 Understand the features and working principles of Arc Welding and accessories.						
Week	Specific Learning Outcome	Teacher Activities	Resources	Specific Learning Outcome	Teacher Activities	Resources
2	<p>2.1 Know the working principles of A.c and D.c welding machines</p> <p>2.2 List and state the functions of the welding accessories, e.g</p> <ol style="list-style-type: none"> 1. welding load 2. earth load 3. electrode holder 4. chipping hammer 	<p>Explain the differences between a.c and d.c arc welding machines and state the working principles.</p> <p>Explain the functions of welding accessories as listed in 2.2</p>	<p>Classroom facilities.</p> <p>Recommended textbooks</p>	<p>2.1 Differentiate between <u>a.C and d.C Arc welding Machines</u></p> <p>2.2 Set up and use the a.c and d.c welding machines for specified voltage/amperage operation, observing safety precaution necessary</p>	<p>Show students the different features in the construction of the arc welding machines</p> <p>Demonstrate the use of a.c and d.c welding machines for specified voltage and amperage observing safety precautions necessary</p>	<p>Arc Welding Equipment</p> <p>Electrodes welding machine</p> <p>Arc welding machine</p>

NVC in Fabrication and Welding (Draft)

<p>3</p>	<p>5. wire brush, etc. 6. welding cables 7. welding shield</p>					
	<p>2.3 Explain the advantages and disadvantages of a.c and d.c welding machines.</p>	<p>List and explain the advantages and disadvantages of a.c and d.c welding.</p>		<p>2.3 Select electrode materials according to parent system</p>	<p>Explain the selection of electrode materials according to parent metals</p>	<p>Electrodes.</p>
	<p>2.4 Explain the following processes of manufacturing electrodes a. Solid extrusion process b. extruded with re-enforcing coating c. dipped process</p>	<p>Describe the processes of electrode manufacturing as listed in 2.4.</p>		<p>2.4 Strike metal arc and maintain the arc</p>	<p>Demonstrate how to strike and maintain the arc Ask students to practice striking metals arc and maintaining the arc</p>	<p>Welding machine Electrodes</p>
	<p>2.5 Describe with sketches the material composition of electrodes.</p>	<p>Explain with sketches, material composition of different types of electrode</p>		<p>2.5 Carry out with proficiency the following arc welding techniques/operations: a. weaving b. laying of multi-runs, etc</p>	<p>Demonstrate with proficiency he arc welding techniques/operations listed in 2.5.</p>	<p>Arc welding machine. Protective wears</p>
	<p>2.6 State electrode classification.</p>	<p>Explain the conventional electrode classification system</p>		<p>2.6 Applying the basic methods of Electrode care described in 2.7 under the theory take care of given electrodes.</p>	<p>Demonstrate the care of electrodes and ask students to do so</p>	<p>Electrodes Drying oven Arc welding machine.</p>
<p>2.7 State the basic methods</p>	<p>Explain the basic</p>					

NVC in Fabrication and Welding (Draft)

	of electrode care, e.g a. dry storage b. oven storage c. safe handling	method of electrode care as listed in 2.7				
General Objective 3.0: Make different types of welded joints in all positions						
Week	Specific Learning Outcome	Teachers Activities	Resources	Specific Learning Outcome	Teacher Learning	Resource
4	<p>3.1 Describe with sketches the application of the following joints in metal fabrication:</p> <p>a) square butt b) single vee c) double vee d) single U box e) open corner, etc</p> <p>3.2 Out line the factors that govern the selection of joints to be used for a project e.g</p> <p>a) type of metal b) thickness of metal c) Type of joint d) position of joint.</p> <p>3.3 Interpret the various arc welding symbols and conventions used in engineering working</p>	<p>Explain with sketches the application of the joints listed in 3.1 in metal fabrication:</p> <p>Explain the factors that govern the selection of joint to be used for a project with reference to 3.2 (a-d)</p> <ul style="list-style-type: none"> Show and explain the various arc welding 	<p>Classroom facilities. Diagrams</p> <p>Recommended textbooks</p>	<p>3.1 Prepare edges for welding the following joints:</p> <p>a. square butt b. single vee c. double vee d. single U e. double U f. open corner</p> <p>3.2 Weld the prepared joints in (3.1) above in flat positions observing necessary safety precautions.</p> <p>3.3 Prepare metal surfaces for:</p> <p>a. Multi –run welds b. weaving welds</p>	<p>Demonstrate preparation of edges for welding joints in 3.4 (e.f)</p> <p>Give students projects that require the joints listed in 3.1 (a-f)</p> <p>Demonstrate welding of joint in 3.1 above in flat position observing necessary safety precautions and Ask students to practice it</p> <p>Demonstrate preparation of metal surfaces for the welds listed in 3.3.</p>	<p>Wire brush</p> <p>Arc welding machine Protective wears.</p> <p>Wire brush</p>

NVC in Fabrication and Welding (Draft)

General Objective: 4.0 Know the properties of basic types of ferrous and non-ferrous metals and how to weld them together						
Week	Specific Learning Outcome	Teachers Activities	Resources	Specific Learning Outcome	Teacher Learning	Resource
9-10	4.1 list four physical properties of cast iron	Explain four physical properties of cast iron.	Classroom facilities.	4.1 Identify by inspection various types of ferrous metals e.g cast iron steel, etc.	Demonstrate by inspection various types of ferrous metals: cast iron, steel, stainless steel, etc	Various type of ferrous metals.
	4.2 state the behaviour of the following types of cast iron <u>when welded</u> a. grey cast iron b. white cast iron c. malleable cast iron.	Explain the behaviour of the types of cast iron when welding as in 4.3 (a-c) above	Recommended textbooks	4.2 Carryout the following processes:- a) Pre-heating b) Post-heating c) Pining d) Fixed – free end welding etc.	Demonstrate the procedures listed in 4.2 and ask students to do so.	Gas welding equipment and lighted.
	4.3 State the use of the following procedures:- a) Pre-heating b) Post-heating c) Pining d) Fixed – free end welding etc.	Explain the uses and demonstrate the following procedures listed in 4.3 (a.d).		4.3 Prepare cast iron pieces by chamfering and preheating etc. and weld them satisfactorily, sing the following techniques: a) Fusion b) Bronze c) Studying d) Buttering	Demonstrate the preparation of cast iron pieces by chamfering and preheating and weld satisfactorily as listed in 4.3 (a-d)	Pieces of cast iron Wire brush
	4.4 Identify various types of non-ferrous metals, e.g a. copper b. aluminium c. brass d. inconel e. monel	Outline various types of non-ferrous metals as in 4.4 (a-e)		4.4 select suitable electrodes and machines for welding various types of given non-ferrous metals	Demonstrate the selection of suitable electrode and machines for welding various types given non-ferrous metals	Arc welding machine and accessories. Different sizes of electrode and welding machine.

NVC in Fabrication and Welding (Draft)

	<p>4.5 Describe the composition and state the mechanical properties of the non-ferrous metals named in 4.4 above, to include:</p> <ul style="list-style-type: none"> a) Ductility b) Malleability c) Hardness d) Tenacity e) Fusion f) Fatigue g) Effect of heat h) Distortion <p>4.6 Outline appropriate heat treatment method for finished welding of non-ferrous metal.</p>	<p>Explain the composition and state mechanical properties of non-ferrous metal in listed in 4.5.</p> <p>List the appropriate heat treatment methods as required in 4.6.</p>		<p>4.5 Weld the following non-ferrous metals and apply the appropriate heat treatment:</p> <ul style="list-style-type: none"> a) Copper b) Bronze c) Aluminium d) Brass e) Inconel/Monel 	<p>Demonstrate the welding of non-ferrous metals and apply the appropriate heat treatment method as in 4.5 (a-c)</p>	<p>Arc welding machine.</p> <p>Pieces of iron ferrous metals Electrodes</p>
General Objective 5.0: know how to Build up worn metallic shafts and surfaces using metal arc welding						
Week	Specific Learning Outcome	Teachers Activities	Resources	Specific Learning Outcome	Teachers Activities	Resources
11	<p>5.1 Identify the composition of given worn metallic shafts or other worn metallic parts. e.g. gear teeth that can be restored by arc welding .</p>	<p>Describe the composition of a given worn metal shafts or parts e.g gear teeth that can be restored by arc welding</p>	<p>Classroom facilities.</p> <p>Recommended textbooks</p>	<p>5.1 Build –up given worn metallic parts to specification using appropriate techniques including controls against distortion</p>	<p>Demonstrate the building up of worn metal parts to specification, using appropriate techniques and control against distortion.</p>	<p>Welding machine and accessories.</p> <p>Worn metallic shaft and gear teeth.</p>

NVC in Fabrication and Welding (Draft)

	5.2 Explain the properties of given worn metallic parts to be restored by arc welding.	Give detailed explanation on the properties as required in 5.2.				
General Objective 6.0: Know how to cut Metals to basic specifications using metal Arc Cutting processes.						
Week	Specific Learning Outcome	Teachers Activities	Resources	Specific Learning Outcome	Teacher Learning	Resource
12-13	6.1 Explain the principles and application of the following arc cutting methods in metal fabrication: a) Air arc method b) Carbon arc method c) Oxy arc method 6.2 Identify Arc cutting electrodes and state their compositions and uses	<ul style="list-style-type: none"> Explain the principles and application of the following arc cutting methods listed in 6.1 in metal fabrication. Explain arc cutting electrode stating their composition and uses	Classroom facilities. Recommended textbooks	6.1 Cut metals with facility using the different cutting methods named in 6.1 under theory.	Demonstrate the cutting of metals using the different cutting method named in 6.1 above and ask students to practise same.	Arc Cutting Electrode and welding equipment.
General Objective 7.0 Know basic welding defect s and how to rectify them						
Week	Specific Learning Outcome	Teachers Activities	Resources	Specific Learning Outcome	Teacher Learning	Resources
14-15	7.1 Describe major defects in arc welded joints including undercut; lack of fusion (side, root , interrun); porosity; slag inclusion oxide entrenchment unequal leg length uneven	Explain major defects in arc welded joint as in 7.1.	Classroom facilities. Recommended textbooks.	7.1 Apply the following tests to detect defects in arc welded joints: a) non-destructive tests such as visual inspection, x – ray test, gamma, ray test,	Show students samples of defects and demonstrate the application of the tests to detect defects in arc welded joints.	Instruments (x-ray, equipment, Ignitron etc)

NVC in Fabrication and Welding (Draft)

	<p>alignment and lack of reinforcement and distortion.</p> <p>7.2 Explain how the weld defects in 7.1 above can be avoided.</p>	<p>Explain how weld defects in 7.1 above can be avoided.</p>		<p>ultrasonic test, magnetic track detector penetrate; b) destructive tests such as bend test, macro and micro examinations sulphur print, izod and fatigue.</p> <p>7.2 Rectify welded joint defects named 7.1 above</p> <p>7.3 Produce project involving the application of: a) General safety precaution b) both ac and dc machines c) ferrous and non-ferrous metals d) Different type of joints in all positions and defect etc.</p>	<p>Demonstrate the rectification of defects and ask students to practise.</p> <p>Evaluate the students in the production process.</p>	<p>Arc and welding machines Electrodes Ferrous and non-ferrous metal Various types of joints.</p> <p>Arc welding machine and accessories.</p>

PROGRAMME: NATIONAL VOCATIONAL CERTIFICATE IN FABRICATION AND WELDING

MODULE: VFW 16 STRUCTURAL STEEL WORK

MODULE CODE: VFW 16

DURATION: 6 HOURS/WEEK: 2 THEORY: 4 HOURS PRACTICALS

GOAL: This module is designed to provide the trainee with knowledge and skills to enable him produce simple finished structural steel work projects with safety.

GENERAL OBJECTIVES:

On completion of this module the trainee should be able to:

1. Understand the safety rules as applicable to structural steel work
2. Understand the basic process of manufacturing iron and steel
3. Know how to use and care for Tools and Equipment used in Structural Steel Work
4. Know the structural properties of materials used in structural steel work and make simple calculations related to their strength
5. Know how to produce simple structural steel projects on the shop floor
6. Know how to assemble simple structural steel components
7. Know the effect of corrosion on structural steel materials and how to apply to protective coating against it.

NVC in Fabrication and Welding (Draft)

General Objective 5.0: Know how to produce simple structural steel projects on the shop floor						
Week	Specific Learning Outcome	Teacher Activities	Resource	Specific Learning Outcome	Teacher Activities	Resource
	5.1 Calculate allowances for forming thick metal or angle bar rings using the following methods: a. mainline method b. neutral line method	Explain calculations of allowances for forming thick metal or angle bar rings using mainline and neutral line method Solve some problems and ask students to practise them.	Classroom facilities. Recommended textbooks	5.1 Produce simple projects in structural steel work e.g stanchion bar plate rafter hunches, etc 5.2 Develop templates with regular surfaces 5.3 Cut out templates from the following materials: a. wood b. cardboard c. any other suitable materials 5.4 Reproduce simple jobs on structural steel materials using templates cut in 5.3 above	Give students projects to demonstrate the production of simple projects in structural steel work Demonstrate how to develop templates with regular surfaces. Demonstrate how to cut templates from various materials. Ask student to cut out template on wood, cardboard etc. Give student Project to demonstrate how to reproduce simple jobs on structural	Welding machine Steel bar Electrode Flux etc Wood, cardboard Razor blade Power sad Cutting machine Riveting machine Hammer Grinder

NVC in Fabrication and Welding (Draft)

				5.5 Sketch and produce simple working jigs, e.g jig for mass production of stanchions, rafters, etc on the shop floor	steel materials using templates in 5.4 above Demonstrate how to sketch and produce simple working jigs. Ask students to do the same.	Torque Spanner Crane Cropper Sheer machine Drilling machine Guillotine Bending machine rolling machine. Drawing instruments
General Objectives: 6.0: Know how to assemble simple structural steel components.						
WEEK	Specific Learning Outcome	Teacher Activities	Resource	Specific Learning Outcome	Teacher Activities	Resource
	6.1 Explain the uses of fixtures and bolts in the assembly of structural components e.g bolting, riveting and welding	Explain the uses of fixtures and bolts in the assembly of structural components Give detailed notes and assess understanding of the topics.	Class room facilities. Recommended textbooks	6.1 Assemble simple structural components such as rafter bracing, simple canopy, simple roof trusses, etc using basic jointing operations.	Demonstrate how to assemble simple structural components, using bolts, rivets and welding operation. Show samples of some of the assemblies	Welding machine Bolts Rivets Files etc

NVC in Fabrication and Welding (Draft)

General Objective 7.0 Know the effect of corrosion on structural steel materials and how to apply protective coating against it.						
Week	Specific Learning Outcome	Teacher Activities	Resource	Specific Learning Outcome	Teacher Activities	Resource
	<p>7.1 Name some common causes of corrosion on steel e.g a. atmospheric b. chemical such as electrolytic action etc</p>	List some common causes of corrosion on steel	Class room facilities. Recommended textbooks	<p>7.1 Prepare the surfaces of structural steel components for finishing with the following methods: b. brushing c. de-greasing d. de-scaling</p>	<p>Demonstrate how to prepare the surfaces of structural steel components for finishing</p> <p>Ask the student to perform the operation above</p>	Grinding machine Fillers Specimen
	<p>7.2 Describe the effect of corrosion on structural steel, e.g a. weakening of structure b. defacing of steel</p>	Explain the effects of corrosion on structural steel	Ditto	<p>7.2 Apply suitable undercoat to structural steel components. e.g red oxide metallization and observe necessary safety precautions.</p>	<p>Demonstrate the application of suitable undercoat to structural steel components and observe safety precautions.</p>	Brush Paint etc
	<p>7.3 Explain the purposes for applying undercoat to structural steel components</p>	Explain the purposes for applying undercoat to structural steel components		<p>7.3 Produce project while applying the safety rules in structural steel work.</p>	<p>Evaluate the students in the process of the production of project.</p>	Materials, tools and equipment listed in 7.1 and 7.2 under practicals.

NVC in Fabrication and Welding (Draft)

	7.4 state the composition of common undercoat used for structural steel work	List and explain the composition of common undercoat used for structural steel work.

List of Tools and Equipment for National Vocational Certificate In Welding and Fabrication

(FOR 30 STUDENTS/TRAINEES)

S/NO		MINIMUM QUANTITY REQUIRED
1.	Power guillotine of capacity 10swg x 36 in length	1
2.	Swing beam folder 10swg x 3'-6' capacity	1
3.	Bending roller capacity 40"x2" diameter	1
4.	Bench mounted cone roller	2
5.	Power bench grinding machine	2
6.	Double-ended buffer and polisher	1
7.	Universal beading and swaging machine	1
8.	Power-operated drilling machine maximum capacity 3/8"	1
9.	Fly Press	1
10.	Hand nibbling Machine	2
11.	Left and right hand snips	5 each
12.	Straight snips	5
13.	A "kit" of tools consisting of hammer, mallet, steel rule, scribe and wing compass, etc.	2
14.	Power saw cutting machine 10mm	1
15.	Disc cutting machine	1
16.	Profile cutting machine with gas cutting nozzles	2

NVC in Fabrication and Welding (Draft)

17.	Pillar drilling machine	2
18.	Straightening machine	2
19.	Cropping machine	2
20.	Straight edge	10
21.	Trammels dividers (set)	10
22.	Hammers	10
23.	Chisels	10
24.	Punches	10
25.	Try-squares	10
26.	Steel rules	10
27.	Smith open forge	1
28.	Vee blocks	10
29.	Electrode holders and clamps	10
30.	Electrode drying oven	1
31.	Heavy duty grinding machine	1
32.	Bench-type grinding machine	2
33.	CO ₂ cylinders	5
34.	Transformers With rectifiers (with all Instruments)	10
35.	Aprons (assorted)	20
36.	Hand gloves	20
37.	Hand shields and head caps	10
38.	Wire brushes	10
39.	Electrical beaters	1

NVC in Fabrication and Welding (Draft)

40.	Pliers – assorted	5
41.	Gas welding goggles	10
42.	Oxygen regulators	5
43.	Acetylene regulators	5
44.	Hoses and clips and all attachments set	
45.	Blowpipes (low and high pressure	5
46..	Tongs	5
47.	Power operated profile cutter with turntable	2
48.	D.C generators with all connections	5
49.	A.C transformer (Argon) with all the connections	10
50.	Argon cylinders	5
51.	Regulators with flow meters	3
52.	Hacksaw and blades	24
53.	Water to carbide generators	4
54.	Carbide to water generators	4
55.	Overhead projector	1
56.	Computer set	1
57.	Anvil	2
58.	Oxy-acetylene welding blow pipe (High pressure & low pressure)	5
59.	Gas cutting torch	2
60.	Set of welding and cutting nozzles	
61.	Swage block	2
62.	Chipping hammers	20

NVC in Fabrication and Welding (Draft)

63.	Plain goggles	20
64.	First aid box	2
65.	Sledge Hammer	2
66.	G. Clamps - assorted	10
67.	Self grip pliers - assorted	6
68.	Magnetic clamp	3
69.	Flatters	2
70.	Molegrip	2

CURRICULUM AND COURSE SPECIFICATIONS FOR NATIONAL VOCATIONAL CERTIFICATE IN WELDING AND FABRICATION

LIST OF PARTICIPANTS

S/No.	NAME	ADDRESS
1.	Omo-Aduigho L. Godson	Nig. Institute of Welding, No. 5 Bakpa Street, Off Wacco Effurun Delta State.
2.	Nasir Garba Mohammed	ERC Ministry of Education, Kaduna,
3.	Musa Bashar	Musa Bashar, Metal Construction Company, Kaduna.
4.	Victor John	Nig. Institute of Welding, No. 5 Bakpa Street, Off Wacco Effurun Delta State.
5.	Taiwo Akinola	Highland College, Ibadan
6.	Adeleke S. Olugesun	Ministry of Education, Office of Special Adviser TVE, Ministry of Education, Lagos.
7.	Engr. BK Mohammad,	FNSE Defence Industries Corporation, HQ, No. 46 Ahmadu bello Way, Kaduna.
8.	Engr. Dr. Nuru A Yakubu, OON	Executive Secretary, NBTE Kaduna
9.	Dr. M S Abubakar	Director of Programmes NBTE, Kaduna
10.	Mal. Lawan Abdulkarim	Ag. HOD Technical Collges Division, NBTE, Kaduna
11.	Mr. A. I. Ifejika	Chief Programmes Officer, NBTE, Kaduna.
12.	Engr. A D K Muhammad	D O VEI/IEI, NBTE Kaduna
13.	Mal. Aliyu Iemu	Assistant Chief Programmes Officer, NBTE, Kaduna.
14.	Engr. J.I. Ukpai, MNSE	Senior Programmes Officer, NBTE, Kaduna.
15.	Engr. Suleiman Mohammad	Programmes Officer, NBTE, Kaduna.
