ENTRY REQUIREMENTS

HIGER NATIONAL DIPLOMA (HND) PROGRAMME

The general entry requirements for the HND Accountancy programme shall be:

- (a) all the requirements for admission into the ND Accountancy/Financial Studies programme, plus
- (b) a minimum of lower credit pass (GPA 2.50 and above) in the ND Accountancy/Financial Studies and
- (c) a minimum of one year Post ND cognate work experience.

Note: In few exceptional cases ND graduates with a pass (CGPA of 2.00-2.49) in the ND that have worked for two or more years in the field may be considered for admission into the HND programme. The number of such candidates, however, should not be more than 20% of the number of students in the class.

CURRICULUM STRUCTURE

The structure of the curriculum of the HND Accountancy programmes consists of four main components. These are:

- (i) General Education Courses
- (ii) Foundation Courses

- (iii) Professional Courses
- (iv) Supervised Industrial Work Experience Scheme (SIWES)

The curriculum of the programme is structured into four semesters of classroom/workshop/laboratory activities within the institution. Each semester of institutional based activities shall be for eighteen (18) weeks duration distributed as follows:-

15 weeks of teaching including practicals, tests, quizzes etc;, 1 week for registration and two weeks for examinations.

ACCREDITATION AND CONDITIONS FOR THE AWARD OF HND

The programme shall be accredited by the NBTE before the graduants are awarded the Higher National Diploma in Accountancy. Details about the process of accrediting a programme for the award of the diploma/certificates are obtainable from the Executive Secretary, National Board for Technical Education, Plot B, Bida Road, P.M.B. 2239, Kaduna, Nigeria.

Institutions offering the accredited programme will award the Higher National Diploma in Accountancy to candidates who have successfully completed the programme course work and research projects, after passing the prescribed examinations. Such candidates should have completed a minimum of 87 semester credit units.

Higher National Diploma shall be classified as follows:-

Distinction	-	GPA of 3.50 and above.
Upper Credit	-	GPA of 3.00 – 3.49
Lower Credit	-	GPA of 2.50 – 2.99
Pass (P)	-	GPA of 2.00 – 2.49

Notes to Teachers Teaching the Programme

The new curriculum is drawn in unit courses. This is in keeping with the provisions of the National Policy on Education, which stress the need to produce the curriculum in semester credit units which will enable a student who may so wish to transfer the units already completed in an institution to another institution of similar standard.

In designing the units, the principles of the module system by product have been adopted; thus making each of the professional modules, when completed, to provide the students with technical operative skills, which can be used for employment purposes.

As the success of the credit unit system depends on the articulation of programmes between the institutions and industry, the curriculum content has been written in behavioural objectives, so that it can be quite clear to all, the expected behaviour of the student who has successfully completed some or all of the courses of the programme.

There is a slight departure in the presentation of the performances based curriculum which require that the conditions under which the performance are expected to be carried out, the teachers activities and the criteria for the acceptable levels of performance are stated. It is a deliberate attempt to make the staff of the department teaching the programme to write their own curriculum stating the conditions existing in their institution under which the performance would take place and to follow that with the criteria for determining an acceptable level of performance. Departmental submissions on the final curriculum may, however, be vetted by the Academic Board of the institution.

It is our aim to continue to see to it that a solid internal evaluation system exists in each institution for ensuring minimum standard and quality of education in the programmes offered throughout the Polytechnic system.

The teaching of the theory and practical work should, as much as possible, be integrated. Practical exercise, especially those in professional courses and laboratory work should not be taught in isolation from the theory.

5.5 Post product costs to the accounts in the cost ledger.						
General Objective 6: Understand contract costing.						
6.1 Define contract costing.	Define and illustrate the process of contract costing with examples.	Overhead projector	1. Compute product cost using job, batch, contract process and uniform costing.	Lead students in computation of product cost using various methods.	Spreadsheets.	Overhead Projector. Transparency.
6.2 Compute contract cost.		Worked examples				
6.3 Prepare contract accounts.						
6.4 Evaluate work in progress.						

General Objective 7: Know process costing.					
7.1 Define process costing.	Illustrate with examples the calculation of equivalent of product cost and preparation of process accounts.	Overhead projector	1. Compute product cost using job, batch, contract process and uniform costing.	Lead students in computation of product cost using various methods.	Spreadsheets. Overhead Projector. Transparency.
7.2 Calculate equivalent units of production.		Worked examples			
7.3 Compile production cost.					
7.4 Define scraps, wastes, normal and abnormal losses and gains.					
7.5 Explain the treatment of scraps, wastes, normal and abnormal losses and gains.					
7.6 Compute unit cost of production.					
7.7 Evaluate work in progress using FIFO, and Weighted Average.					
7.8 Prepare process accounts.					
7.9 Define joint and by-products.					
7.10 Evaluate and apportion joint costs.					

General Objective 8: Know Service Costing.						
8.1 Define service costing. 8.2 Calculate cost per service unit.	Illustrate the calculation of cost per service unit. Give gradable assignment.	Overhead projector Worked examples	1. Compute product cost using job, batch, contract process and uniform costing.	Lead students in computation of product cost using various methods.	Spreadsheets. Overhead Projector. Transparency.	
General Objective 9: Understand Uniform Costing.						
9.1 Define uniform costing. 9.2 State the objectives of uniform costing. 9.3 State the features of uniform costing. 9.4 List the advantages and disadvantages of uniform costing.	Explain uniform costing and its uses drawing comparative analyses with other costing methods.	Overhead projector Worked examples	1. Compute product cost using job, batch, contract process and uniform costing.	Lead students in computation of product cost using various methods.	Spreadsheets. Overhead Projector. Transparency.

	Specific Learning Outcomes	Teacher's Activities	Resources	Specific Learning Outcomes	Teacher's Activities	Resources
	1.1 Define Bankruptcy. 1.2 Distinguish between Insolvency and Bankruptcy. 1.3 Outline causes of Bankruptcy.	Explain clearly the difference between Insolvency and Bankruptcy.	Overhead projector	1. State the basic concept of Bankruptcy, insolvency and their causes. 2. State the provision of the Bankruptcy Act and the differentiate classes of debtors who may be declared bankrupt.	In groups: Ask the students to clearly distinguish between Bankruptcy and Insolvency. Ask the students to list the causes of bankruptcy and insolvency. Guide the class in describing the classes of debtors who may be declared bankrupt.	Flipchart Statute

General Objective 2: Know the provisions relating to acts of Bankruptcy.						
	2.1 Outline the acts of Bankruptcy. 2.2 Explain classes of debtors who may be declared Bankrupt. 2.3 Explain the term “deferred’ debtor”.	Show classes of debtors who may be declared bankrupt and deal with the causes of acts of bankruptcy.	Overhead projector	1. State the basic concept of Bankruptcy, insolvency and their causes. 2. State the provision of the Bankruptcy Act and the differentiate classes of debtors who may be declared bankrupt.	Ask the students to clearly distinguish between Bankruptcy and Insolvency. Ask the students to list the causes of bankruptcy and insolvency. Guide the class in describing the classes of debtors who may be declared bankrupt.	Flipchart Statute.

General Objective 3: Understand Bankruptcy proceedings and discharge.						
3.1 Outline bankruptcy procedures from petition to the receiving order.	Explain procedures petition. Provide Examples.	Overhead projector Worked examples	1. Illustrate by way of distinction between deeds of arrangement and scheme of arrangement. 2. Outline the bankruptcy procedures from petition to receiving order by describing proceeding after receiving order to the discharge of bankrupt.	Lead the students to state with appropriate examples petition procedures. Test students on the processing, after receiving order to the discharge. Short word processed answer report	Bankruptcy Act 1990. Word processor	
3.2 Differentiate between deeds of arrangement and scheme of arrangement.						
3.3 Explain alternatives to bankruptcy proceedings – its advantages and disadvantages.						
3.4 Describe proceedings after receiving order to the discharge of the bankrupt.						
General Objective 4: Know properties available for distribution.						
4.1 Identify properties available for distribution.	Give adequate illustrations on property distributions.	Overhead projector Worked examples	1. Classify properties available and unavailable for distribution.	Ask the students to illustrate property distributions.	Bankruptcy Act 1990.	
4.2 Identify properties not available for distribution.						
4.3 Describe the concepts of “Onerous properties”.						

General Objective 5: Understand Trusteeship in Bankruptcy.						
5.1 Describe the relationship between the official receiver and the trustee.	Describe the functions of the official receiver and the trustee.	Overhead projector	1. Identify the powers and duties of a trustee in Bankruptcy and outline powers that can be exercised independently by the trustee.	Test students understanding by simple quizzes, the relationship between the official receiver and the trustee.	Bankruptcy Act 1990. Interactive quiz on computer	
5.2 Outline the powers the trustee can exercise independently and those duly conferred on him by the creditors.						
5.3 Explain the duties of the trustee in Bankruptcy.						
5.4 Recapitulate on work done so far.						
General Objective 6: Know how the distributions of properties are carried out.						
6.1 Explain the different classes of creditors.	Test the students on the principles and concepts so far covered.	Overhead projector	1. Write the process of lodge proving and distinguishing different classes of creditors.	Lead the students to discuss classes of creditors and list the order of debt payment. Group presentation	Bankruptcy Act 1990.	
6.2 Explain the process of lodge proving.		Short test				
6.3 Outline the order of payment of debt.						

General Objective 7: Understand Executorship Law.					
7.1 Define the following terms: Executor, Will - Testate, Intestate, Executrix and Beneficiaries.	Explain the problems of intestate. Explain the consequences of a valid Will.	Overhead projector Case study examples	1. Write out the terminologies common in executorship law. 2. State the consequences of a valid will.	Guide the student to differentiate different types of wills. Ask the students to list the problems of intestate.	Format of a Will. Bankruptcy Law 1990.
7.2 State the Elements of a valid Will.					
7.3 Outline the different types of Wills.					
7.4 Describe the procedure for grant of probate.					
General Objective 8: Understand the methods of devaluation of property.					
8.1 Outline the rights and duties of Executors.	Explain methods of property devaluation.	Overhead projector Worked examples	1. Apply the skills acquired on the methods of property devaluation.	Lead the class into discussion, to outline the rights and duties of executors.	Stature
8.2 Explain the Executor and the Administrator.					
8.3 Describe family provision					

General Objective 9: Know classification of trusts.						
9.1 Define different classes of trusts.	Illustrate the process or creation of trusts.	Overhead projector	1. Identify the creation and classes of trusts and who may be trustees or beneficiaries.	Ask the students to illustrate the process of trusts creation in a short report	Word processor	
9.2 Explain the term "creation of trusts".						
9.3 Describe the concepts of charitable trusts.						Worked examples
9.4 Explain who may be trustees or beneficiaries.						
General Objective 10: Understand Trusteeship Law.						
10.1 Describe the process of appointment and confirmation of trustees.	Illustrate graphically, use a format or appointment letter and explain clearly the term, committee of inspection.	Overhead projector	1. Describe the process of appointment confirmation and remuneration of trustees.	Ask the class to form a discussion group and discuss the trustees liability for breach of trusts citing relevant decided cases.	Bankruptcy Act 1990.	
10.2 Explain the role of Board of Trustee and Committee of Inspection						Graphs and charts
10.3 Describe trustees liabilities for breach of trusts.						
10.4 Describe the rights, privileges and remuneration of trustees.

	1.1 Define the concept of analysis. 1.2 Define decision making. 1.3 Identify decision situation. 1.4 Explain decision making process. 1.5 Explain scientific approach to decision making.	Define and explain decision, decision situation, process and analysis.	Overhead projector	Understanding of the nature of decision making. Understanding of the scientific approach to decision making	Group discussion followed by presentation to the class concerning the nature of decision making	Flipchart
	General Objective 2: Understand Operational Research Methodology today.					
	2.1 Define an operation. 2.2 Explain concept of operational research. 2.3 Explain basic structures of or for decision making process.	Define and explain O.R., its characteristics, structure and operational stages.	Overhead projector	Ability to understand and apply operational research methodology	Group exercise matching operational research methodology to a variety of	Internet Flipchart

	2.4 Explain O.R. stage in developing countries, (2.5) Solve O.R. type problems.				different commercial scenarios	
General Objective 3: Understand Modelling.						
	3.1 Explain the nature of models. 3.2 Explain the uses of models. 3.3 Identify advantages and disadvantages of models. 3.4 Explain the process of modeling. 3.5 Classify models e.g. ICONIC, analogue, symbolic/mathematical etc. 3.6 Identify advantages and limitations of mathematical models. 3.7 Prototypes in O.R.	Define and explain modeling. Explain the process and types of modeling. Explain various prototype in O.R. to date. Carry out visitations' to places where models are located e.g. libraries.	Overhead projector Worked examples	Understanding of the nature and application of business modeling techniques to business scenarios	Students to produce a spreadsheet showing the effects of various interest rates on a typical loan agreement	Spreadsheet Case study
General Objective 4: Understand the process of single stage decision theory.						
	4.1 Explain decision under certainty. 4.2 Explain decision under risk. 4.3 Explain decision under uncertainty.	Solve case studies on decision under risk and uncertainty.	Overhead projector Case studies	Understanding of the nature and application of decision theory with respect to business scenarios	Students to work in groups solving case study examples under uncertainty	Flipchart Case Study
General Objective 5: Understand the process of multi-stage decisions theory.						
	5.1 Identify multi-stage decision situation. 5.2 Formulate problems into decision tree. 5.3 Solve and interpret	Solve case studies on decision three problems.	Overhead projector Case studies	Ability to understand and use decision trees to solve business problems	Students to solve decision problems using decision trees	Decision tree statistical package on Excel spreadsheet

	decision tree problems.					
General Objective 6: Understand Inventory Control and Production Model.						
	6.1 Derive inventory model under non-instantaneous supply. 6.2 Derive EOQ model under non-instantaneous supply. 6.3 Solve EOQ problems under instantaneous supply. 6.4 Derive inventory model under non-instantaneous supply. 6.5 Derive EOQ model under non-instantaneous supply 6.6 .Solve EOQ problems under non-instantaneous supply.	Assign and solve problems and/or case studies on Inventory problems. Arrange visitation to Company stores and observe stock taking.	Overhead projector Case studies	Ability to work out and apply EOQ model. Understanding of the issues and importance of effective inventory control.	Students to work on EOQ problems and present as a word processed exercise.	Sample problems Word processor
General Objective 7: Know Queuing Theory.						
	7.1 Explain the concept of queuing (waiting lines). 7.2 Explain queuing objectives and cost behaviour. 7.3 Explain the assumptions of queuing model. 7.4 Formulate single server model. 7.5 Explain cost analysis in queuing.	Explain Queuing problems and solve case studies on queue problems. Carry out visitations to banks hospitals and traffic point where there are queues.	Overhead projector Case studies	Ability to understand and solve queuing problems in service situations.	Group exercise to solve a complex business case study scenario. Group present findings to class	Internet Flipchart Powerpoint/ flipchart

General Objective 8: Understand Simulation.					
8.1 Explain general nature of simulation.	Explain and solve case studies on simulation problems.	Overhead projector	Ability to devise simulated programmes to solve business problems	Students to test the outcomes of a marketing scenario using simulated outcomes.	Case study
8.2 Identify the advantages and limitations of simulation.					Internet
8.3 Explain the Monte Carlo simulation method.					
8.4 Apply simulation to solving real life cost analysis problems.					Powerpoint/ Flipchart
				Group presentation	
General Objective 9: Understand Linear Programming.					
9.1 Define Linear Programming.	Explain L.P. problems. Solve case studies on L.P. problems.	Overhead projector	Ability to understand and solve problems linear programming techniques	Students to use linear programming to solve several project scheduling problems.	Case study
9.2 Identify the major requirements of L.P. problems.					Internet
9.3 Explain allocation problems.					
9.4 Identify the properties of LP					
9.5 Explain the assumptions of LP model.					
9.6 Formulate LP model-maximization and minimization.					
9.7 Solve LP problems:- - Graphical approach (maximization and minimization). - Simplex Method (maximization and minimization).					
9.8 Explain the concept of duality in L.P.					
9.9 Solve dual L.P. problems.					
				Group presentation	Powerpoint/ Flipchart
General Objective 10: Understand Special Purpose Algorithm: Transportation, Assignment and Branch-and-Bond-					

method.						
10.1 Explain the nature of transportation problems.	Explain transportation problems.	Case study	Ability to solve transportation problems using the above techniques.	Students to research and solve a case study business transportation problem.	Word processor	
10.2 Explain the characteristics of transportation problems.	Solve case studies on transportation problems.	Internet			Internet	
10.3 Formulate transportation models.					Case study	
10.4 Solve transportation problems.		Powerpoint/ Flipchart		Individual short report produced		
10.5 Explain the concept of MODI Method.						
10.6 Explain assignment method.						
10.7 Explain Branch-and-Bond method of assignment problem.						
10.8 Distinguish between assignment problem and L.P. problem.						
10.9 Identify the difference between assignment and transportation problem.						
10.10 Formulate assignment model.						
10.11 Solve assignment problems using assignment model.						
10.12 Solve transportation problems using L.P. method.						
General Objective 11: Understand PERT, SPM and Network Analysis.						
11.1 Define PERT.	Explain with graphic illustration, network analysis	Overhead projector	Ability to understand and apply network analysis	Students to work on case	Computer statistical	
11.2 Explain the general

Course: Managerial Economics	Pre-requisite:	Theoretical: 3 hours/week - 75%
Semester: 4		Practical: 1 hours/week - 25%

Goal: To give special attention to theories interpretation and application of concepts of managerial economies so as to enhance the student's understanding of the various methods and techniques used in managerial decisions.

GENERAL OBJECTIVES:

On completion of this course, the student should be able to:

- 1.0 Understand the scope of managerial economics.
- 2.0 Know a working definition of business objectives.
- 3.0 Understand the importance of Investment decisions in both private and public enterprises.
- 4.0 Understand fundamental issues involved in pricing including the techniques used in both private and public sectors of the economy.
- 5.0 Understand some basic ideas of the demand side of markets.
- 6.0 Understand indifference theory- (alternative method of explaining the consumers behaviour).
- 7.0 Understand theory of the firm: (The operations of the economic agents performing with the different market structures).
- 8.0 Understand corporate strategy.
- 9.0 Understand cost analysis.
- 10.0 Understand the different types of business organization.
- 11.0 Understand operation research techniques.

1	1.1 Give a working definition of managerial economics. 1.2 Explain micro-economic theory in business decision-making (consumer theory, pricing theory, demand analysis, cost theory etc).	1. Provide student with aid of a simple example a clear meaning. 2. Lead the student in examining the application of economic theory to business problems.	Textbooks, journals, magazines and other relevant materials.	Understand the working definition of managerial economics. Understand consumer theory, pricing cost theory and demand analysis.	Generate a mathematical problem to arouse student understanding	Class quiz. Class exercise.
General Objective 2: Know a working definition of business objectives						
1	1.1 Define profit as an objective. 1.2 Evaluate the internal and external influence of objective.	1. Provide a clear explanation of profit among other business objectives. 2. Lead the student in appraising some of the influencing factors.	- ditto -	Analyse profit as an objective. Analyse both endogenous and exogenous variables influencing objective.	Express profit in form of equation. Formulate mathematical equation for student to solve.	Mathematical tools. Computer statistical package

General Objective 3: Understand the importance of Investment decisions in both private and public enterprises						
2 -3	3.1 Explain the nature of investment decisions. 3.2 Describe modern techniques of investment appraisal and related problems. 3.3 Compare and distinguish between net present value and internal rate of return. 3.4 Describe traditional methods of investment appraisal. 3.5 Explain cost/benefit analysis and public expenditure.	1. Explain of the existing nature of investment. 2. Lead the student in examining modern techniques of investment and work out solutions to some examples. 3. Provide explanation on the conventional methods and its shortcomings. 4. Illustrate with aid of data and graph an analysis of non-conventional techniques used in public expenditure appraisal.	Charts, Overhead Projector, Text book, Journal and Magazines.	Understand investment decisions. Understand investment and project appraisal. Understand feasibility of project. Analyse and understand NPV, IRR and other methods of investment appraisal. Understand cost/benefit analysis	Design an investment proposal. Spur students to appraise it with different methods.
